

**Participation is free.  
No proof of immigration  
status or health  
insurance required.**

**You can sign up if you:**

- ✓ Think or know that you had COVID-19
- ✓ Are 18 years of age or older
- ✓ Live in the NYC metro area

## Why should you participate?

- Minority communities have been heavily affected by COVID-19. Having a diverse and representative group of participants will ensure that the study research can help those most impacted by this disease.
- You can confirm if you were infected with COVID-19.
- Help researchers in your community understand how COVID-19 impacts us over time.
- As we learn more about the impact of COVID-19, we will share regular updates with the community.

COVID Recovery Corps is a research study. The study does not provide medical care or treatment.

**Learn how you can take part.**

### 1. Register and take the surveys

Visit [www.covidrecoverycorps.org](http://www.covidrecoverycorps.org) to register and tell us about your COVID-19 symptoms.

### 2. Share your samples

We will ask you to give samples to test for COVID-19 antibodies which tell us if you had the virus in the past.

### 3. Learn with us along the way

We will share your test results with you, along with information about what those results may mean. We will also reach out in the future to ask if you still have symptoms.

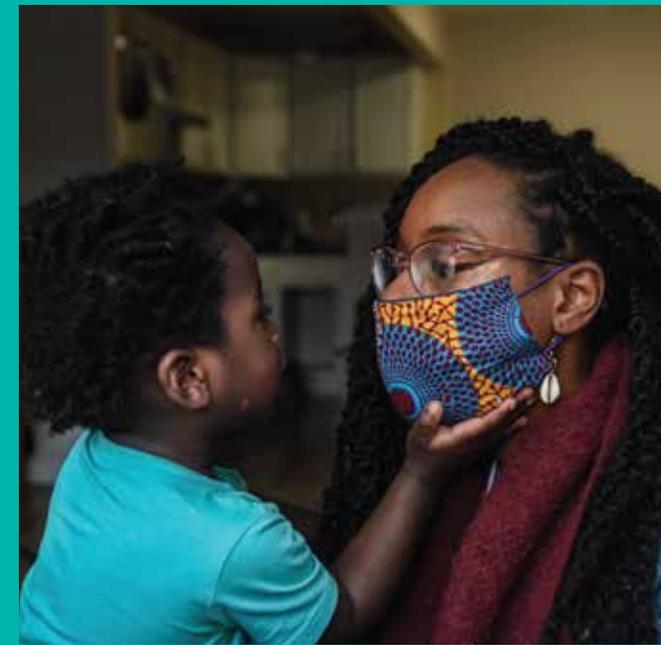

## Our Mission

There is an urgent need to understand how COVID-19 will impact New York's communities over time.

Our mission in this study is to understand how people recover from COVID-19 and the impacts of the disease on health, both today and in the future.

By sharing your recovery experience, you can help researchers unlock the mysteries behind this disease and provide important new information for you, your loved ones, and thousands of others affected by the virus.
